This auction for USED Taco I-Series mixing valve 3/4" 200% tested install just for 1 month and returned

Please ask any questions before bid

Auction included only valve (see the pictures) NO MOUNT

Taco 807CBE I-Series Mixing Valve 3/4" NPT : Taco-Series mixing valves can be used instead of a conventional injection system. An integrated outdoor reset control built into the Taco II valve eliminates the need for purchase and installation of a separate reset control and control valve. The Taco-Series mixing valves can also be set to perform a zone-by-zone outdoor reset, at optimal control and comfort for every zone. The direct-drive actuator modulates the valve which injects different rates of hot water, supplying virtually any desired water temperature to the fan. The maximum and minimum system supply temperatures can be adjusted for any job type, including single-up radiant heated floors that require a higher starting temperature. The Taco-807C includes an adjustable freeze protection function, which prevents low water temperatures from entering the boiler, and thus protecting it. A multi-status LED indicator, giving-in wiring over noticeable activities, the installation is fast and easy.
