

Product description

Introducing the climate system for the connected home. Impressively smart and easy to use, ecobee₃ automatically adjusts to deliver comfort when you're home and savings while you're away. With its revolutionary remote sensors, the most important rooms in your home will always be at the perfect temperature. ecobee₃ not only looks better, it works better.

Key features

Brains

With **Smart Recovery**, ecobee₃ knows when to turn on your heating or cooling equipment based on the weather and your home's energy performance. That means your home will always be at the temperature you want before you wake up or when you arrive home.

Beauty

ecobee₃'s sleek and modern design is a beautiful addition to your home, and will complement the other technology products in your home. The intuitive touchscreen makes ecobee₃ a pleasure to use.

Energy savings

Heating and cooling accounts for half of your energy bill, and on average ecobee₃ can save you 23%* on heating and cooling costs.

Control on the go

Monitor and control your ecobee₃ anytime, anywhere, on your smartphone, tablet or computer. The ecobee app is available for iOS and Android.

Energy reports

Home IQ is an easy-to-understand home energy report you can view anytime through your ecobee web portal. You will receive diagnostic information and tips to help maximize savings.

Reliable

ecobee is viewed by consumers as one of the most reliable thermostats on the market, with Consumer Reports giving ecobee a top 3 ranking of 94%.

Easy to use

74% of ecobee customers run a customized schedule to maximize comfort and savings. In comparison, only 20% of non-ecobee customers with programmable thermostats run a schedule.

Open API

ecobee's open API makes it easy for home automation products like SmartThings and Control4 to integrate with ecobee₃.

Advanced HVAC features

ecobee₃ comes with advanced HVAC features such as Frost Control, Free Cooling, DataRhythm Technology, and are ZigBee and OpenADR certified.
