

Studs
24" OC

A photograph showing the interior of a roof structure. The rafters are made of wood and are spaced at 24 inches on center (OC). The rafters are covered with a layer of insulation, which appears to be a combination of fiberglass batts and a layer of rigid foam board. The insulation is secured with a layer of sheathing, likely plywood or OSB. The rafters are labeled with "R23" in blue ink. The text "Roof Rafters 24\"/>
