

LEED FSC Certified Wood Vendor Notification

Dibble Twinsprings LEED Gut Remodel Project 2012 to Present

To Whom it may Concern:

RE: Certified Wood and No Added Urea Formaldehyde

To encourage environmentally responsible forest management through the selection of wood-based products that are certified in accordance with the Forest Stewardship Council's (FSC) Principles and Criteria, for all wood materials used on this project, indicate whether or not they are FSC-certified and provide the FSC Chain-of-Custody certification number.

No composite material containing any added urea-formaldehyde shall be included in the purchases for this project. Select only composite woods that contain no added urea-formaldehyde and use at least 50% (based on cost) FSC-certified wood products.

Please label wood products with Country of Manufacture.

Sincerely,

Ellen Dibble
