

Alpen Windows and Doors

We purchased Alpen Windows and Alpen glass in ThermaTru doors through A&E Building Supplies in Golden. Alpen, a local company, builds the most energy efficient windows made in the U.S. We have 525S (Stainless spacers) windows at U factor of at least .17 (R 5.9) for picture windows and .20 (R 5) for casements.

The glass on the south is the highest solar gain I could find at .48 SHGC and the west, east and north windows are lower at .24. Doors are the 725 series that have an R-7 rating.
